RE: Solar ground mount footing and assembly for Tamarack Solar, 288 F Street, Arcata, CA 95521

As per your request, I have evaluated the proposed footing and assembly for the solar array. The solar array consists of 4 panels with 1 footings. The following loads were used in the analysis of the pole mount system:

Snow load	70 psf
Wind speed	130 mph (ASCE 7-16)
Exposure Category	B
Soil Lateral Pressure	150 psf/ft
Soil Vertical Pressure	2000 psf

It is my recommendation that the MT Solar design (TE-103) will adequately support the solar array. The footing should be reinforced per detail 6. The 6" schedule 40 pipe supporting the solar array should be embedded as the footing shown.

The contractor shall notify the engineer if there are any discrepancies including soil profile. Right Angle Engineering assumes no responsibility for improper installation of solar panels or their components. Alterations to this engineering design and/or sealed plans shall not be made without direct written consent of the engineer of record.

Respectfully,

Mar 24 2023

Robert D Smythe, P.E.
Right Angle Engineering

CONCRETE SPECIFICATIONS

Concrete: ASTM C150 - Type I or II
 28-Day Strength: $f'_c = 3000$ psi
 Fly Ash: ASTM C618 - Class C or F permitted up to 25% (by weight)
 Non-shrink Grout: $f'_c = 3000$ psi

REBAR SPECIFICATIONS

ASTM A615 - Grade 60 Deformed Bars
 Yield Strength: $f_y = 60$ ksi

STEEL SPECIFICATIONS

Column: ASTM A53, AISC Schedule 40/80

Detail 6

THIS CONFIGURATION SATISFIES THE REQUIREMENTS SET FORTH IN THE:

- 2018 INTERNATIONAL BUILDING CODE
- 15TH ED. AISC STEEL DESIGN MANUAL

MATERIALS:

- GR 5 BOLTS USED AT ALL CONNECTION LOCATIONS U.N.O
- STEEL MATERIALS CONFORM TO THE FOLLOWING
- STEEL PIPE: ASTM A53, GR B, Fy=35 KSI
- WIDE FLANGE SECTIONS: ASTM A992, Fy=50 KSI
- RECTANGULAR HSS SECTIONS: ASTM A500, GR C, Fy=50 KSI
- PLATES: ASTM A36 Fy=36 KSI

CONCRETE WORK TO BE IN ACCORDANCE WITH ACI 318-14

- CONCRETE SHALL HAVE A MINIMUM COMPRESSIVE STRENGTH OF (F_c) OF 3000 PSTM
