

Water-Miser™ SAFETY-VENT

The most advanced industrial battery flip-top vent cap available today.

An injection molded "Flip Top" vent cap addressing areas of safe and efficient maintenance during the routine servicing of industrial , semi-industrial, and golf cart batteries

When a battery is equipped with the economical and reliable "WATER-MISER SAFETY-VENT"...

- There is no need to remove vent-caps...Just FLIP open for inspection and watering
- Fits all U.S. Manufactured bayonet quarter-turn batteries
- External initiated explosions are virtually eliminated due the the incorporated hydrophobic cindered disc
- Tops of batteries remain much drier
- Cap closure rotates a full 360°
- Accommodates all single cell fillers with diameters up to 3/4 inch
- Flow System cap adapters allow for fitting of European batteries such as Clorinde, Varta, Fulman, etc.
- Labor saving in 6 months compensates for the Water-Miser Safety-Vent
- Outperforms better than any other vent cap in the industry.
